

- Insert, PUSH the collar down and TWIST it by one turn to secure engagement.
- Simply pull back the collar to disengage.

How to

Caution:

- If the engagement is not secure enough, simply twist the collar by a further turn.
- Please ensure the valve head is parallel with the valve and pressed all the way down when inserted.
- If the collar cannot be pushed down properly : please **pull it back and twist it** counterclockwise before further attempts.
- Please do not attempt to lubricate.

Push & Twist is compatible with :
